

INSTALLATION INSTRUCTIONS TRACK CONTROL ARMS

-  **1** Raise the car on a lift up to working level (read car manual for instructions to lift the vehicle). Remove the wheel.
-  **2** Loosen nyloc nut of the ball joint.
-  **3** Use mounting tool to remove the ball joint.
-  **4** Unscrew nuts and remove bolts.
-  **5** Replace it by Sidem part.
-  **6** Mount securing bolts but don't tighten them yet.
-  **7** Mount the wheel and lower the car. Move car forwards and backwards several times.
-  **8** Tighten wheel bolts. Apply tightening torque according to the car manufacturer's instructions.
-  **9** Secure the mounting bolts while the car is at rest. Take the car for a test drive. After repair the wheel alignment needs to be checked and adapted if necessary.
