

THE RIGHT SOLUTION FOR STEERING AND SUSPENSION PARTS

PRODUCT
OPTIMIZATION

MAKING SMART PARTS

Sidem has developed a **closed ball joint system for Hyundai and Kia**, where the preload is already determined during its production.

We also make installation simple for you! Ask for the right mounting tool SIDEM REF R10092.

Closed balljoint
SIDEM REF 81182

CREATING SAFE SITUATIONS

Sidem's ball joint is designed in such a way that the closed system prevents dirt and humidity from infiltrating before (or during) installation, in opposition to the OEM reference's open concept. As a consequence, care-free installation and longer life span of the ball joint is ensured. During installation, the ball joint's pre-assembled design will prevent that too much pressure is exercised, resulting into high torque movement and causing premature wear on the plastic insert. On the other hand, exercising insufficient tension, resulting into play, will also be avoided by the design.

OEM REF:
Cumbersome installation by open concept

BUILDING A STRONG REPUTATION

Sidem's specially designed ball joint can be applied in several makes within the Hyundai and Kia range. You can find all the reference information in the table below.

REF SIDEM	REF OEM	DESCRIPTION	APPLICATION
81182	51760 2R000	ball joint	Hyundai I30 (FD) & I30 CW (FD) Kia CEE'D (ED), CEE'D SW (ED) & PRO CEE'D (ED)
R10092		Mounting tool	

For Hyundai and Kia
