THE RIGHT SOLUTION FOR STEERING AND SUSPENSION PARTS

MAKING SMART PARTS

Sidem has developed a new patented solution for replacement of press ball joints for the Dacia, Renault and Lada range. This new solution is part of Sidem's reengineered range of steering and suspension parts and guarantees easy installation and maximum safety.

Patented solution ball joint

CREATING SAFE SITUATIONS

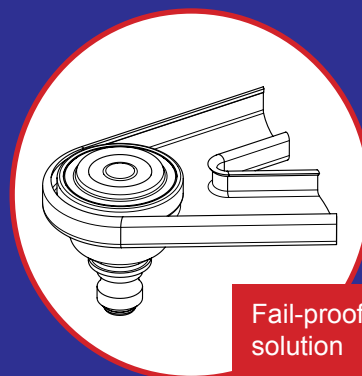

Unlike most suppliers, Sidem's patented solution offers a suspension part which is reliable, straightforward and cost-effective for replacement. This reengineered part is based on a self-locking ball joint in the track control arm during installation. The ball joint's design has been upgraded with grooves making the part lock itself when pressed into the track control arm. The automatic fixation ensures easy installation with only one step. In addition, this solution guarantees maximum fixation of the part.

Smart design housing

EXPERTS TRUST THE SPECIALIST

This solution offers workshops and mechanics a patented solution for reliable and easy installation. Sidem's parts are always delivered as a complete set. This parts is delivered with a supplementary retaining ring and protection plate. This solution is possible for Dacia Logan, Dacia Sandero, Renault Thalia and Lada Largus. An overview of the applications for this reference can be found in the below table.

Fail-proof solution

REF SIDEM	REF OEM	DESCRIPTION	APPLICATION
5782 R	54 50 042 69R	Ball joint	DACIA LOGAN, DACIA SANDERO, LADA LARGUS
	54 50 113 62R
